

 **Dynamic Management and Alarm Management Seminars** Join us at our Baton Rouge office for our seminar series on Dynamic Management and Alarm Management of Process Control Systems.

Dynamic management can increase productivity, reduce downtime, and improve safety. The seminars are specifically designed to help you realize these benefits through the optimal dynamic management of your control system. The seminars are ideal for managers and engineers in plant operations, control systems, and safety and reliability.

ProSys has been approved by the Louisiana Professional Engineering and Land Surveying Board (LAPELS) as a sponsor for continuing professional development. Our seminar series provides up to 24 Professional Development Hours (PDHs).

 **Seminar 1 | 6 PDHs**
“General Alarm Management Philosophy and Methodology”

This seminar is designed to convey the basic philosophies of dynamic configuration without reliance on a specific control system vendor or solution. This will provide you with a firm knowledge base on how to practically implement a dynamic configuration solution in your plant’s environment.

Topics Why Alarm Management?	Dynamic Alarming
Objective of Alarm Management	Case Logic
Normal and Abnormal	Alarm Shelving

 **Seminar 2 | 18 PDHs**
“Implementation of The Only Complete Alarm Management Solution”

This seminar is designed for those who either already have or are looking into an alarm management solution. An in-depth analysis of how to implement AgileOps—the industry’s first truly unified process control execution environment—will be covered.

Topics Change Management and Rationalization
Audit, Notification, and Enforcement
Operator and Engineer Alarm Shelving
Dynamic Management of Alarms
The Future of AgileOps
